Chapter Meeting
February 10th, 2016

Meeting Location: Casa Rina
886 Commerce Street
Thornwood, NY 10592

5:30 - 6:00PM Arrival and Networking
6:00 - 6:30PM Tech Session
6:30 - 7:30PM Buffet Dinner
7:30 - 8:30PM Main Presentation
(1 PDH)

\$25 Members, \$30 Non-Members
Complimentary Admission for Engineering
Students
Walk-ins and General Public Welcomed

The 2014 New York City Energy Conservation Code

This presentation gives a synopsis of the requirements of the 2014 New York City Energy Conservation Code. This code is based upon IECC 2012 but includes a number of important amendments, including some amendments to ASHRAE Standard 90.1-2010 that is referenced in IECC. The presentation includes an introduction to the submission requirements and to the inspection protocols required to insure that the constructed works are consistent with the submitted documentation .

Presented by Daniel Nall, P.E., FASHRAE, FAIA, BEMP, HBDP

Mr. Nall is a Vice President of Syska Hennessy Group in New York. A graduate of Princeton University and Cornell University, he is a Registered Architect, a Professional Engineer, an ASHRAE Life Fellow, a Fellow of the AIA, a LEED Fellow, a certified Building Energy Modeling Professional and a High Performance Building Design Professional. ASHRAE activities include the ASHRAE Advanced Energy Design Guide Steering Committee, the Building Energy Quotient Ad-Hoc and Oversight Committees, and TC 4.7. He has been a member of the Board of Directors of the USGBC NY Chapter, the vice-chairman of the USGBC Energy and Atmosphere Technical Advisory Group and a member of the AIA National Committee on the Environment.

Tech Session—Belco Pipe

Our tech session shall explore a methodology of dealing with aging piping by cleaning and lining the piping which can be helpful for inaccessible piping and for facilities with other critical operating needs. Robotic piping lining systems for many applications (varieties of pipe and facilities) will be covered by Steve Friedlander and David Barnett of Belco pipe.
