8:00 – 9:00 AM Arrival and Breakfast

9:00 – 10:00 AM Technical Presentation
and Tour of Facility

No Fee for admission

EYE PROTECTION REQUIRED FOR TOUR

Breakfast will be provided

RSVP REQUIRED

Presentation – BIM Modeling and Sketching in Duct Fabrication

We will have a brief presentation on the new technologies and techniques being employed by Elmsford Sheet Metal Works, Inc. Specifically, we'll talk about BIM modeling and sketching and how it has changed the production process. The group will be shown the sketching department and a short presentation of the sketching software will be given. Breakfast and coffee will be provided during the presentation.

Tour – Elmsford Sheet Metal Works Factory

After the presentation and breakfast we will have a guided tour of the sheet metal factory floor. Mark DiPasquale, Vice President of Elmsford Sheet Metal, will walk us through the full fabrication and assembly process of one of the last construction trades that still starts with bare materials and forms them into installable products.

EYE PROTECTION IS REQUIRED FOR TOUR

Please bring your own safety glasses as spares will be extremely limited.

Elmsford Sheet Metal Works, Inc. is a leader in sheet metal ductwork fabrication in the region. Founded in 1947, Elmsford Sheet Metal Works has more than 60 years of experience and hundreds of satisfied customers. Specializing in large, difficult projects for commercial and industrial businesses, they coordinate, manufacture and install sheet metal ductwork and other products designed to meet project specific needs. They are also experienced with "plan and spec" contracts. Dozens of skilled drafters and sheet metal workers create standard and customized sheet metal products on state-of-the-art equipment in their 20,000 square-foot facility.

Coming Months: May 24th - ASHRAE's Bi-State's Annual Golf Outing at The Links at Unionvale
June 14th – Tour of Bull and Barrel Brewery with Airflow Balancing 101 presentation by DL Flowtech
