100 Oritani Drive  
Blauvelt, NY 10913

12:00 – 1:00 PM Lunch and  
Presentation

1:00 – 2:00 PM Factory Tour

1 PDH Approved

**Membership Promotion and Student  
Activities theme**

Complimentary Admission for all  
Walk-ins and General Public  
Welcomed  
RSVP Requested

## Condensing Boilers – Lessons Learned

The course will discuss factors pushing the market toward high efficiency equipment and the changing technology to meet those demands. We will define condensing technology and how to apply it in practical terms. The presentation will cover system design criteria to maximize efficiency, the impact of boiler turndown and part load efficiency, condensing boiler construction, acidic condensate disposal, venting design and NYC DOB requirements, and auxiliary equipment requirements.

The presenter will be **Geoff Cullen, P.E.** with G.A. Fleet.

## Hard Hats, Eye Protection, and Steel Toed Shoes Required.

Sandals and Heels are prohibited.

Some PPE will be available for those that do not have adequate equipment, but please try to bring your own.

## Student Activities and Sustainability Theme
